

Title:**High Fidelity UI Design for Food Delivery Application****Introduction:**

This project focuses on designing a high-fidelity food delivery application interface using Figma. The objective was to transform a basic wireframe into an interactive and visually appealing design.

Design Process:

1. Wireframe analysis
2. Color selection
3. Typography selection
4. Component creation
5. Prototype linking

Features:

- User login
- Restaurant search
- Food categories
- Restaurant details
- Cart management

Tools:

- Figma
- Unsplash Images
- Material Icons

Conclusion:

The final UI design provides a smooth and intuitive user experience by following modern UI/UX principles such as consistency, accessibility, and simplicity.
